

## 2nd Grade Students in Tiers 1-3 of Instruction - Math Essentials

An example of how we monitor student performance on grade level essentials is through the tiers of instruction and support needed over the course of the year. We monitor at the individual student level, but use data like this to better understand the movement throughout the grade. Our goal is to reduce the number of students in our Tier 2 and Tier 3 instruction based on their mastery of the essential standard. This is determined through teacher designed and delivered CFAs.
