Norms for Data Analysis

- Suggested norms:
  - No judgments
  - No blaming
  - Focus on what the data tells us about current practice
  - Focus on problem solving and the future
  - Focus on results for students
  - Consider all possibilities
  - Maintain confidentiality

Data-Analysis Protocol

Questions	Responses
What worked well?	
Where do our students struggle the most?	
Item analysis: Which problems did students most frequently miss? Why?	
How can we improve the assessment?	
What teaching strate-gies can we share for interventions and extensions?	
Who are our at-risk students? How will we group for interventions?
