

Name _____

First Quarter Open Ended Benchmark

Money Worksheet

1) Jack went to see a movie at the movie theater. The cost of one ticket is \$3.25. Jack gave the movie theater clerk a \$5 bill. How much change should he expect to get back?

- Draw the bills and coins that he could have received back as change.

2) Jane also went to the movies. She bought one ticket and some popcorn. The popcorn cost \$4.55. She gave the movie theater clerk a \$10 bill. How much change should Jane get back?

- Draw the bills and coins she could have received.
