

Liberty STAAR Performance Trends

2016 - 2019

June 12, 2019

In order to accurately track FISD performance changes over time, this report applies the current-year Approaches, Meets, and Masters performance standards to the past four years of STAAR results. For 5th and 8th Grade Reading and Math it contains the best performance from the first and second administrations. For all other exams it only contains the Spring administration performance. The report does not include STAAR Alt 2 or STAAR Spanish scores. Each performance category data point shows the percent of students who achieved that category or better (eg. a data point of 93 percent for the Approaches category indicates that 93 percent of students achieved the Approaches performance category or better).
